

RKL Relayers

The RKL Relayers have been a part of the Western Berks Relay family for over a decade. Each team member has their own personal story, including survivors, caregivers and members who have had family or friends diagnosed. In 2011, our partner, colleague and friend, Jim Houck, lost his battle with cancer. Every year since, we have honored his memory by continuing our mission to raise funds and awareness in the fight against cancer.

Since the 2016 Relay, another partner and friend in our Reading office, Mike DePaul, was diagnosed with blood cancer. Even as he started an intense treatment process, he was still committed to sustaining his work/life balance. We're inspired every day by the positivity he's displayed throughout what has been a very difficult journey. The smile on his face is assurance that our efforts in this fight really do make a difference.
